

CCMS DATA EXCHANGE DATA SHEET

ADMINISTRATIVE OFFICE
OF THE COURTS
INFORMATION SERVICES DIVISION

Court Receives Case Participant In-Custody Indicator Notification (PF804)

Exchange Description

A trial court uses this NIEM-based data exchange to receive a request for case participant in-custody notification from an integration partner to update the participant's person/entity record in CCMS.

An integration partner may use this data exchange to:

- Notify the court when a defendant is taken into custody
- Notify the court when a defendant is released from custody

The notification message sent by the integration partner to the trial court contains the in-custody indicator information (e.g., participant and in-custody indicator).

No response message is sent by the integration partner upon successful receipt of the notification message. Successful delivery of the notification message is assumed unless an error in delivery or processing by the integration partner occurs.

Business Response Exchanges

The business response refers to any subsequent exchanges that may occur as a direct result of this exchange, as follows:

- There is no business response to this exchange.

PROBABLE INTERESTED INTEGRATION PARTNERS

- County jail

RELATED EXCHANGES

Related data exchanges are any preceding or subsequent data exchanges that may be used by an integration partner as part of the overall business process related to this exchange.

- There are no related exchanges.

For more information about this and other data exchanges, contact integrationpartners@jud.ca.gov

Error Handling

If the trial court does not successfully receive and process the incoming message, the integration partner will receive an error message with an error code and error reason.

Additional Information

- A single exchange message is sent for each case participant in-custody notification.
- The response to this exchange message only occurs after receipt and processing by the integration partner. The only allowable response to this exchange is an error message. The error response message must be sent as a separate message using the error format defined in this exchange.
